FEBRUARY 1954

WASHINGTON, D.C.

INTRODUCTION

This booklet is an annual publication of the Agricultural Conservation Program Service which brings together in summary form, data by practices and by States with regard to conservation measures performed on participating farms, and also includes, by States, information with respect to participation, amount of assistance, pooling agreements involving conservation practices of community benefit, accomplishments under the Naval Stores Conservation Program, and other related data.

Information with respect to the extent of the conservation measures performed under the 1952 Agricultural Conservation Program (Tables 1 and 2) was obtained from applications and performance reports filed by participants in the program. The amount shown under "Total credit value" in Tables 1 and 2 was computed by multiplying the extent of the practice or sub-practice by the "credit rate". The resulting "credit value" is not the same as the ACP assistance for the practice. In no case does it include any of the funds for "small payment increases" (which are required by legislation), and in some cases it is larger than the ACP assistance because the full credit rate per unit was not provided on the total extent reported.

The national total of the credit value is \$244,783,241, as compared to the national total net payments actually made of \$188,759,432 (exclusive of the Naval Stores Conservation Program). Thus the net payment was 77% of the credit value (National Basis). An estimate of the amount of assistance for each practice in a State may be made by multiplying the total assistance (for all practices in the State) by the "portion of State total" which is shown for the practice. The "portion of State total" was obtained by dividing the total credit value for the practices by the total credit value of all practices in the State.

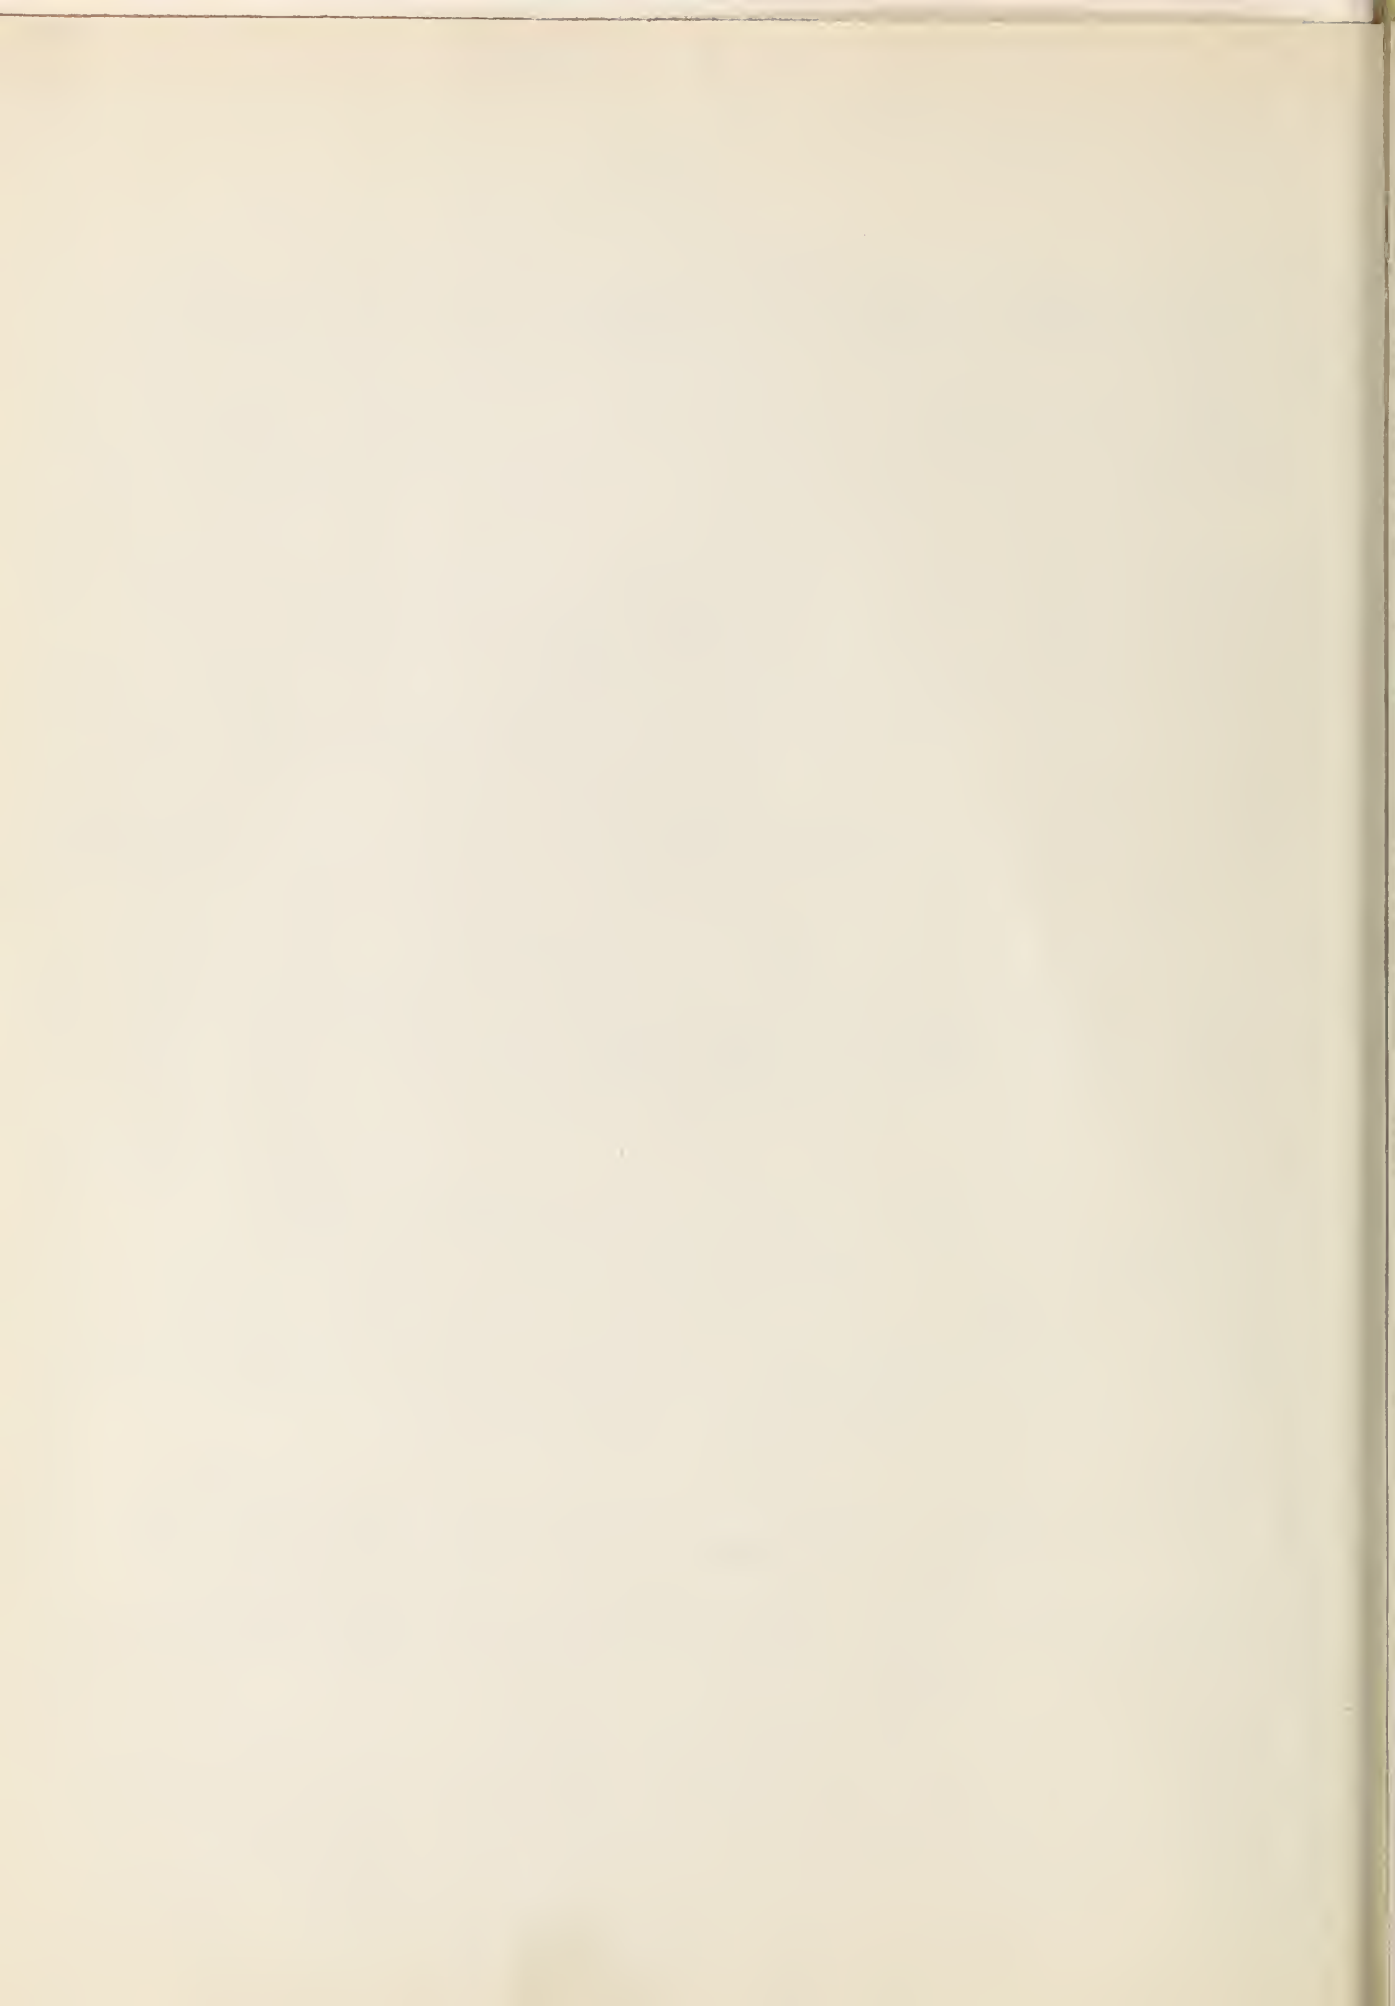

Information by States for previous years has been published in earlier issues of this series, in "Agricultural Statistics," and in the annual reports of the Chief of the Agricultural Adjustment Agency, and the Administrator of the Production and Marketing Administration. The statistics included were collected by county and State Production and Marketing Administration offices (now Agricultural Stabilization and Conservation Committee offices).

Approved under Reports Control No. ACP-13P.

1/ For the years 1936 through 1943 the Agricultural Conservation Program included commodity payments and assistance for carrying out conservation practices. For the years 1944 through 1951 the Agricultural Conservation Program included only assistance for carrying out conservation practices, except as noted.

2/ Does not include turpentine places under Naval Stores Conservation Program.

3/ Persons receiving cash assistance or Conservation Materials and Services, including Naval Stores Conservation Program.

4/ Insular areas not included.

5/ Includes payment for potatoes and truck crops made from funds under Section 32, Public Law 320, 74th Congress.

6/ Includes \$22,455,000 for flax authorized by Section 5, Public Law 551, 78th Congress.
